

Points to Adhere on Pets/Stray dogs handling

- Pet owners are advised to ensure that their pets are health and clean. Sterilisation is advised.
- Pet owners are advised to ensure proper vaccination and regular health care for their pets.
- Pet owners are advised to make every effort to keep their pets quite, particularly during night hours.
- Pet owners shall not abandon or leave the pet alone tied or untied at any occasion.
- Pet owners or care givers are advised to cleanup when the pet defecates in public premises. Such civic sense is the need for a gated community like this.
- Leashing of pets in public places assures that the passerby is safe and will be more comfortable when an owner is present.
- Those who feed stray dogs are advised to participate in periodical sterilisation and vaccination too.
- **Care-givers are advised not to feed stray dogs inside the campus.**
- Moreover feeding must not be done in a manner that contributes littering or dirtying the premises.
- Care-givers are advised to clean up the space after feeding.
